### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

The disclosure is objected to because of the following informalities: The disclosure uses the term “educator” to describe member 26. It is assumed that educator means –educator--.

Appropriate correction is required.

Claims 5,6,11 and 13 are objected to because of the following informalities: “educator” should be changed to –educator--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hatton 5871340.

Hatton discloses a method of using a downhole multi-phase twin screw pump for use in wells having a high gas content. A supplementary liquid channel (such as 204) is positioned within housing 114 in fluid communication with the pumping screw (see figures 5-8). A supplemental liquid is fed through the channel to the pumping screw, thereby enhancing a liquid seal around the pumping screw. As to claim 2, the supplemental liquids are provided by a trap 212 that captures apportion of the liquid stream being moved by the pumping screw and recirculates the liquid portion as the

supplementary liquid. As to claims 3 and 7, the trap is positioned along the fluid flow passage. As to claims 4 and 8, liquid traps are provided at all of the rotors or pump screws and would be considered positioned adjacent the wellhead when the top most pump screw is being looked at. As to claims 5,6,11 and 13, pump 206 is considered an eductor. As to claim 9, the housing has an intake and an outlet end and a flow passage extending between the inlet and outlet.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Neuder whose telephone number is 571-272-7032. The examiner can normally be reached on Tuesday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
